

FORMULARY ADVISOR[®]

Manage and distribute your formulary and deliver critical pharmacy information to prescribing clinicians with **Formulary Advisor** from the Healthcare business of Thomson Reuters.

A hospital's formulary is vital for containing rising drug costs and promoting patient safety. But managing and updating that formulary can be time-consuming. Plus, ensuring clinicians consider the formulary when making prescribing and dispensing decisions can be a challenge. Formulary Advisor helps manage a hospital's formulary and provides immediate access to formulary information throughout your entire facility. Accessible via desktop computer and handheld devices, Formulary Advisor guides prescribing clinicians toward formulary drugs, saving your pharmacists, nurses, and physicians time—and your facility money.

BENEFITS

- Fulfills The Joint Commission's formulary management and pharmacy information distribution guidelines
- Maximizes your time with quick and easy formulary updates
- Reduces costs by eliminating your formulary books
- Reduces nonformulary medication orders and increases formulary compliance
- Delivers prescriptions faster to patients

FEATURES

- Handles multiple formularies
- Integrates with Micromedex[®] drug information
- Links to documents, Web pages, customized formulary information, and therapeutic exchanges

P&T COMMITTEES

Committee members can easily review and provide input in the formulary management process. Plus, you have the ability to instantly communicate formulary changes to prescribing clinicians.

PHARMACISTS

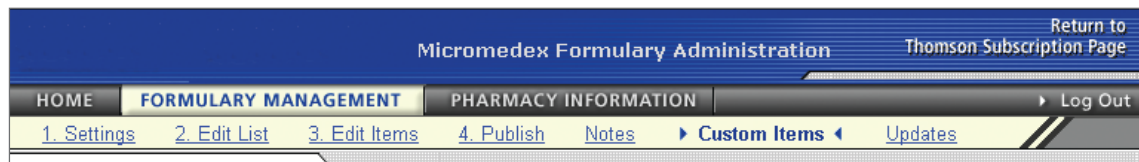

Save valuable time by quickly updating and distributing your formulary via the Internet. This communication tool reduces the number of nonformulary medication orders and increases formulary compliance while saving the hospital money. You can also distribute prescribing guidelines to clinicians through the Notes function.

PHYSICIANS AND NURSES

Search for drugs on the formulary and link to evidence-based drug information on your desktop computer or handheld device. Save time with immediate access to the hospital's formulary in the initial stages of the prescription process. This reduces the number of nonformulary medication orders, increases compliance, and saves the hospital money.

ADMINISTRATOR ACCESS FOR FORMULARY MANAGERS

Formulary managers can easily manage the facility's various formularies, even if there are multiple facilities or department-specific formularies. Get started quickly by uploading your formulary details and adding new drugs from the RED BOOK® drug file.

Administrators can incorporate therapeutic interchanges for each drug and dosage, and make them stand out to end users by including an icon. Your relative or actual cost information can also be incorporated.

END-USER ACCESS FOR PRESCRIBING CLINICIANS

Formulary Advisor efficiently helps clinicians:

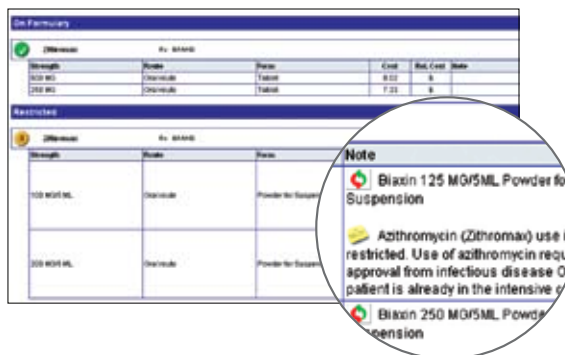

- Search for drugs by trade or generic name, or by therapeutic class
- View formulary details, including formulary status and cost information
- View prescribing notes posted by the administrator
- Link to integrated Micromedex drug information
- View pharmacy procedures, guidelines, and alerts

IMPLEMENTATION AND TRAINING SUPPORT

Thomson Reuters provides an implementation team to give you the support needed to get your formulary up and running, ensuring a quick and easy transition to Formulary Advisor.

The administrator tool also makes it possible to:

- Simultaneously import notes, pricing, status tiers, and therapeutic interchanges
- Create one or more formularies, add custom drugs, and associate cost information
- Update a formulary using the latest RED BOOK drug information
- Post guidelines, alerts, policies, and hyperlinks to other Web resources
- Distribute your formulary changes to clinicians via a stand-alone desktop computer or handheld device
