

Index Nominum International Drug Directory

from Thomson Micromedex

- ◆ Designed to meet the drug information needs of pharmacists, drug & poison information centers, physicians, research & medical centers, pharmaceutical companies, libraries, pharmacy & medical schools, drug wholesalers, international import/export pharmacies, and purchasing departments.
- ◆ Quickly locate information about a drug's generic name, brand name, synonym, therapeutic category, chemical structure, CAS number, or manufacturer

Recognized worldwide, **Index Nominum** is an international drug directory that provides access to approximately 5,300 substances and derivatives, 12,800 synonyms, and 41,800 trade names from 45 countries.

The Micromedex version of **Index Nominum**, edited by the Swiss Pharmaceutical Society, provides electronic access to an international drug directory of generic substances, drug trade names, synonyms, chemical formulas, therapeutic classes, and manufacturer information. Designed to meet the drug information needs of drug and poison information centers, pharmacists, physicians, research and medical centers, pharmaceutical companies, and libraries, the System presents area-specific information for more than 133 countries for preparations used in human medicine.

Index Nominum enables users to locate information by entering a substance name, therapeutic category, brand name, synonym, chemical name, manufacturer name, or country. Each monograph provides detailed information about a drug's name and synonyms, chemical structure diagrams, and a list of...
...manufacturers. Name and address information

enables the user to conveniently identify manufacturers worldwide. By entering a manufacturer name as a search term, the System will isolate and display a list of drugs handled by that manufacturer.

Index Nominum contains:

- 41,800 drug trade names
- 12,800 official and unofficial synonyms
- 5383 substances and derivatives
- 9,700 manufacturer names and addresses
- CAS numbers
- Chemical structures
- Therapeutic classes
- ATC codes
- molecular weights
