

# MICROMEDEX<sup>®</sup> IV INDEX<sup>®</sup> SYSTEM

When multiple IV medications are combined, the risk of complication is very real. Efficacy of one or more drugs can be reduced or a potentially dangerous incompatibility can occur. The **Micromedex IV INDEX System** from the Healthcare business of Thomson Reuters provides easy access to proven data to help ensure that accurate IV-compatibility decisions are made at the point of care with confidence.

- Features **Trissel's™ 2**, the latest database from the ultimate authority on IV compatibility—Lawrence Trissel, MS, FASHP
- Includes over 3,500 references—more than any other resource available
- Enhances patient safety by pinpointing potentially dangerous combinations
- Helps clinicians interpret conflicting compatibility results by identifying contributing factors
- Supports confident decisions with multiple studies, including complete information on manufacturer, concentration, stability, and other conditions

## PHARMACISTS

Reduce significant and potentially dangerous IV incompatibilities with quick answers to all your questions. Plus, when you need more in-depth details, you can drill down to comprehensive study results.

## NURSES

This easy-to-understand tool gives you at-a-glance confirmation to determine compatibility. Plus, instant access from your station computer increases efficiency and saves you time.

*Smart search functionality quickly jumps to matching drug names as you type.*

## FEATURES

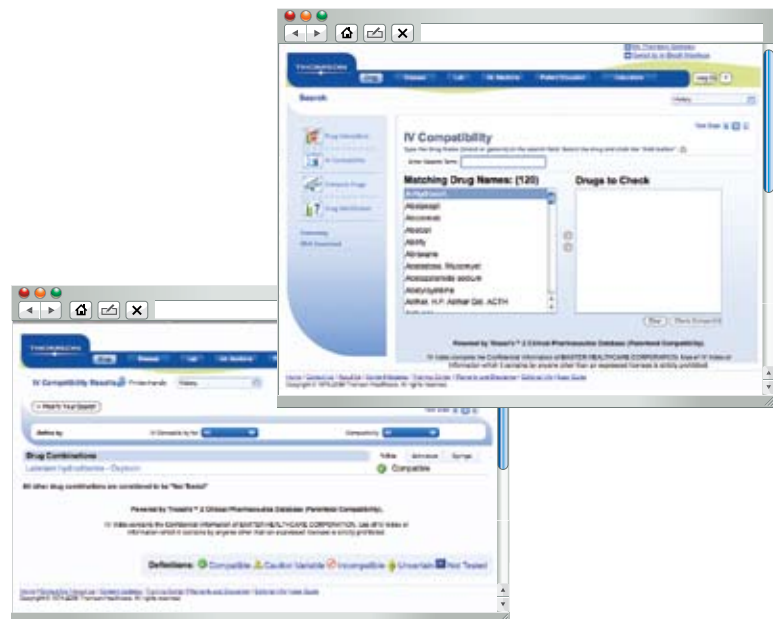

- 700 parenteral drugs and solutions, including chemotherapy drugs
- More than 60,000 compatibility results
- Solution, Y-Site, syringe, and admixture compatibility information
- TPN/TNA data
- Allows for either single or multiple drug searches
- Uses smart-search functionality for easy drug name look-up

## BENEFITS

- Helps clinicians make quick decisions at the point of care
- Ensures optimal drug utilization and cost-effectiveness throughout the facility
- 5,000 fully referenced articles

## SINGLE AND MULTIPLE DRUG SEARCHES

IV INDEX allows both single and multiple drug searches. When checking the compatibility of multiple drugs, you can highlight several choices at one time and simply click “Add.”

## OVERVIEW RESULTS

Overview results are collapsed into a single, easy-to-read table with a separate tab for each delivery method.

If all study results for the drug combination are compatible, you will see the **Compatible** indicator.

If results from multiple studies differ, the **Caution: Variable** indicator signals you to drill deeper. Other indicators include **Incompatible**, **Uncertain**, and **Not Tested**.

## DETAIL RESULTS

You can view full study information from multiple studies, including:

- concentration
- manufacturer
- compatibility results
- physical compatibility
- chemical stability
- method
- storage
- container
- study period

## TPN/TNA INFORMATION

IV INDEX also includes hard-to-find Total Parenteral Nutrition (TPN)/Total Nutrient Admixture (TNA) compatibility information. Detailed notes highlight the composition of the TPN tested.

## ABOUT THOMSON REUTERS

The Healthcare business of Thomson Reuters produces insights, information, benchmarks and analysis that enable organizations to manage costs, improve performance, and enhance the quality of healthcare. Thomson Reuters is the world's leading source of intelligent information for businesses and professionals.
