

NEOFAX® ONLINE

More than 430,000 premature babies are admitted to neonatal intensive care units (NICU) each year. Because commercially available drugs are not tested on infants in the United States, more than 90 percent of the drugs prescribed to them are off-label. Consequently, neonatal drug dosing is among the most complex and error-prone in healthcare today.

As part of the Micromedex Healthcare Solution, **NeoFax Online** is an Internet-based application providing the full spectrum of neonatal drug dosing information. Its intuitive interface makes this a must-have resource for physicians, nurses, and pharmacists who work in the NICU. Using NeoFax Online will help improve consistency across the neonatal care team and reduce medication errors.

A MUST-HAVE NEONATAL DRUG INFORMATION RESOURCE

- Provides complete neonatal drug information, covering more than 150 substances
- Ensures critical information and tools are readily available at the point of care
- Ideal for those who prescribe, compound, or administer medications

FEATURES

- Easy-to-use interface
- Infant formulas that include a breakdown of nutrients per 100 calories
- Quick online access
- Comprehensive neonatal drug information
- Browser-based software for NICUs

BENEFITS

- Reduces medication errors
- Helps identify adverse reactions/effects
- Guides neonatal drug dosing
- Accessible any time, anywhere via handheld PDA
- Saves time and keeps dosing accurate

ABOUT THOMSON REUTERS

The Healthcare business of Thomson Reuters produces insights, information, benchmarks and analysis that enable organizations to manage costs, improve performance, and enhance the quality of healthcare. Thomson Reuters is the world's leading source of intelligent information for businesses and professionals. We combine industry expertise with innovative technology to deliver critical information to leading decision makers in the financial, legal, tax and accounting, scientific, healthcare and media markets, powered by the world's most trusted news organization. The screenshot displays the NeoFax Online web application. At the top, there is a navigation bar with tabs for 'Infant Formula', 'Patients', 'Drug Dosing', 'PN Orders', and 'Password'. Below this, a search interface is visible with a 'Drug Category' dropdown set to 'All' and an 'Alpha Filter' input field. A list of drugs is shown, with 'Acetaminophen' selected. To the right of the list, there are three yellow callout boxes with instructions: '<< Select the category of drug to display. DR', '<< Enter the first few letters of the drug's name.', and '<< Select the drug to display.' Below the search results, the detailed information for 'Acetaminophen' is displayed, including sections for 'Dose & Administration', 'Uses', 'Monitoring', and 'Adverse Effects/Precautions'. A red arrow points from the text 'Provides complete neonatal drug information, covering more than 150 substances' to the 'Acetaminophen' section.
