

# Quick Tip

## #8 Link directly to the solution you need.

If you access Thomson Healthcare Evidence Solutions via the Internet, you can link directly into Micromedex® Healthcare Series, CareNotes®, or the Point-of-Care Solution without having to click through the gateway. Simply create your own Internet browser favorites using the following links or ask your IT staff to set up a shortcut on your desktop or the hospital's intranet.

Internet users:

- **Healthcare Series:** <http://www.thomsonhc.com/hcs/librarian/>
- **Point-of-Care Solution:** <http://www.thomsonhc.com/clinicalxpert/librarian>
- **CareNotes:** <http://www.thomsonhc.com/carenotes/librarian/>

If you're accessing the content via your internal intranet, you can create a shortcut by replacing the "www.thomsonhc.com" part of the URL with your facility's server host name.

Remember, when you're in the Healthcare Series and want to switch to the summary-level content in the Point-of-Care Solution, all you have to do is click the link titled, "Switch to Point-of-Care Interface" at the top right corner of your screen.
